Project description

The theme we've chosen is education. We have decided to run a mock business called Study+. Our target customers are SPM candidates, and we offer basic subjects that many SPM students take, like mathematics, bahasa melayu, english and sejarah. This business is considered as a charity business since we allow low-income parents to register their kids for a cut price to ensure all could enjoy equal education. This has come in line with sustainable development goal number 4, which is quality education where not only the rich can enjoy superb education, but to give golden opportunities to the poor to get quality education and change their life for a better future.

Our website contains 11 pages, starting with the Home page that will welcome the user, about us page, the Course page for user to view available courses offered, schedule page to see time of each subjects, ,Registration page where possible subscriber can register, Discount page for needy student to get cut-price, Payment page for possible subscriber to make payment, feedback page, student support page, privacy policy page and lastly Schedule page for more detail about the timetable of each offered subject and lastly Contact page for our contact information in case visitor have any inquiry. Our design theme is minimalist, so we don't have much things going on. The main colors used is blue-purple gradient. Our main fonts are serif, to keep things simple.

In terms of organizational flow, we first greet the user with home page, then they may go to about us page to read about our organization, then go to course schedule to see the timetable of each subjects, then register to register for any subjects, then go to discount if they are needy students, after that go to payment to settle the payment, then they can go to feedback page to give their opinion on the subject, then we have help page to solve certain issues, after that is privacy policy page to state our policies, lastly is the contact us page where you can get through us via phone and other social media .

Project Site-Map

Group Contribution

Name. matric No	Contribution
Afnan Wajdi Bin Ramlee(2117745)	<ul style="list-style-type: none">● Pages : registration, Discount● Created the dropdown navigation menu● Create the overall theme(background color, font, container style)● Created popup message● Created the styling for navigation menu(top left of container,icon,sizing,background color)● Created the business logo● Monitor group progress● Teaches how to implement dropdown navigation menu● Create the final report google docs and correct all mistakes based on madam's comment on proposal● Fix the Location of navigation button on about us page and schedule page● Fix container positioning (make it centre) on schedule page and contact page● Worked with hashim to compile● Check the functionality of all pages
Muhammad Adam bin Zakaria (2113577)	<ul style="list-style-type: none">● Pages :create course page, payment● Added transitions in css based on respective pages.● Create a hover on the submit button in the CSS payment page.● Implement jquery to create error messages in payment.● Create and design pages.
Mao xin yu(1917015)	<ul style="list-style-type: none">● create schedule pages, Done and put in the right place.

	<ul style="list-style-type: none"> ● create about us pages, Done and put in the right place. ● Added annotations in the css part. ● Created text information in about us. ● design schedules pages and about us. ● Gives ideas for type page creation and other issues. ● Actively ask about progress. ● Modified the report ,Revise error html ● Implement icon for dropdown button. ● Create a script to know the location of our address
Muhammad Faiq Danish Bin Zulkifli (2115107)	<ul style="list-style-type: none"> ● Pages: create home page, contact us ● Gave the idea of copyright and social footer on each pages ● Created a copyright of our website on footer ● Created social footer to contact us, as such, Instagram, Facebook and WhatsApp ● Create and design pages ● Implement icon for dropdown button ● Create a script to know the location of our address ● Fixed the align of home and contact us page respectively ● Removed the dropdown button on home page and changed it to navigation button on header instead
Mohamed Ali Muhammad Hashim (1811707)	<ul style="list-style-type: none"> ● Mock page design ● Created a privacy policy page ● Created a Student Support Page where they can search Faq using keywords (Javascript), used json to store faq questions. ● Created a feedback, where the user can choose the subject they want to review, add their comment, rating for

	<p>the subject (1-5) and when they press submit everything gets cleared and a pop up message shows up thanking the user for the input.</p> <ul style="list-style-type: none">● Fixed errors and revamped home page.● Planned and Worked with Afnan to edit pages that needed adjustments.
